To :the health departments / politicians - worldwide gladly forward - Enlightening information.

Anzonico, revised July 2022.

Subject: desire for openness to solutions other than vaccination, which is an artificially manipulated virus in most countries - with only one spike - and therefore should have a different name - which indicate the dangers

Dear Sir or Madam,

It has come to our attention that we are receiving reports from the public that nurses are noticing that Covid patients are being treated incorrectly and do not dare to say these abuses anywhere. The basic knowledge that vitamins and trace elements protect our cells and make them strong against any kind of virus has been largely lost. The simple hygienic measures in combination with natural remedies are insufficiently known - that is why we attach a summary table. Many essential oils have antibacterial and antiviral properties, as well as old known medicinal plants, some of which have been successfully tested.

Without adequate supply of plenty of fluids - water or tea, our body can not even defend itself in the case of mucus and high temperatures. This varies from individual to individual, but for an adult person in the minimum 3 liters / day - and all expectorant drugs must be taken promptly with plenty of fluid (without sugar). The interplay of power and profit-seeking, also in the medical field, should be questioned and stopped - and instead of this misinformation, it should be exposed with the truth, for the protection of the population and preservation of life.

There are also increasing reports that people who were quarantined at home and simply ate a healthy diet and resorted to natural remedies had more success than patients in hospitals.

Again, children dared to tell us what they wanted: Hospital is the wrong word, it should be called Wellness - Health Houses and so the meaning and sense will be renewed.

We thought a lot, researched intensively on the Internet and also exchanged ideas with critically thinking people.

Conclusion: There should be no vaccination obligation, an artificially manipulated virus can cause diseases, which no doctor can estimate any more, and is a contamination of the body - therefore also the increased Covidfälle of already vaccinated humans which received an injection.

Since we have also learned from circles in the upper chemistry that sometimes it is not possible for people in the professions to make a report, because otherwise they would have no more job opportunities and livelihood elsewhere, we ask you to take seriously also at counseling centers indications that serve the protection of life and the population.

Should the Covidvirus as an old variant have several spikes (all natural viruses have several spikes), and the body can defend itself well with a functioning immune system, apparently many also lack the knowledge that our immune system needs enough oxygen to do so. This is increasingly prevented by the alleged airborne transmission risk - from which the mask requirement has been derived.

I myself, together with my wife, have found out within 3-4 months of intensive research simple means, which can be taken for prevention and in case of emergency.

The connections which we have recognized in order to be able to cooperate with media and reporting offices / governments are serious and could put one on the alert. Therefore we ask you to call dissenters no longer as lateral thinkers. Please take hints seriously, especially from critical doctors & fellow citizens, because the situation was largely caused by misinformation of the population. The virus is represented visually with many spikes and is supposed to seem dangerous thereby and in expert circles with a spike for the research traded - which points to an artificial variant. Give the word to people who even as experts have already given some warnings. Like for example that the vaccines are also again artificially manipulated viruses with a spike - and their long-term effect could become even more complicated than a survived infection. This could become very costly and distressing with any new autoimmune diseases that might arise as a result - which there could be. Also, recent evidence from the U.S. military has revealed that more than a doubling of human infertility is noted after vaccination.

Media stokes fear and thus achieves a change in laws and the resulting control and isolation of people has greatly diminished the quality of life and health for many. We are happy to see children and others laughing again and most have returned to a healthy lifestyle. Our goal is to set an example of courage, joy of life and love to the following generations and to give them the tools to raise their voices critically and successfully with a basic knowledge of nature.

This also includes the basic right to make free health decisions.

We know many who keep themselves healthy naturally. For us, prayer to Jesus and the God of Israel, who is the creator of the whole universe and earth and has thoughts of life and peace over us, is also part of this.

**In this sense we wish you a blessed work and good health for the future.**

Kind regards

Ralph Behnke and wife Sabine Behnke
